

READINESS PROFILE

Mayur B.

Information Technology · Graduated · Priyadarshini College of Engineering, Nagpur · Class of 2026

OVERALL READINESS

4.25 / 5.0

HIGH READINESS

4

Learning agility

4

Communication

4.4

Technical depth

4.5

Project readiness

Strong full-stack foundation with substantial project experience, REST API development, database expertise, and 250+ DSA problems solved.

01 Skills, scored on evidence

90TH PERCENTILE · +0.2 VS COHORT · 6 SKILLS · 4 SOURCES

SKILL	SCORE 1 - 5	LEVEL
Programming proficiency	4.5	ADVANCED
Databases & SQL	4.5	ADVANCED
APIs & web fundamentals	4.5	ADVANCED
DSA & problem solving	4.5	ADVANCED
Version control & testing	3.5	STRONG
OOP & service design	4	STRONG

Scale: 1 emerging - 2 developing - 3 proficient - 4 strong - 5 advanced. Evidence for every score is on page 2.

02 What they are building next

ACTIVE GROWTH AREA

Testing and engineering quality practices · 2.5 / 5

Strong development experience with an opportunity to strengthen testing and delivery discipline. Mayur has strong implementation and project experience, but explicit evidence of automated testing, CI/CD and systematic quality practices is limited

RE-ASSESSMENT DUE

2026-12-01

Scores are a point in time, not a fixed label.

Mayur B. · Decision detail

Supporting detail for the recommendation on page 1: what was observed, what it means, and what should happen next.

03 Role-specific evidence

THRESHOLD: 3.5 / 5.0 · 6 OF 6 AT OR ABOVE THRESHOLD

COMPETENCY	SCORE	READINESS	EVIDENCE	IMPLICATION
Programming proficiency	4.5	READY	Java, C, C++, JavaScript and TypeScript; Multiple full-stack applications; Current full-stack development internship	Supporting signal for the report.
Databases & SQL	4.5	READY	SQL, MySQL, MongoDB and PostgreSQL; Database integration across multiple projects; JDBC-based hospital management system	Supporting signal for the report.
APIs & web fundamentals	4.5	READY	6+ RESTful API endpoints; Node.js, Express.js and Spring Boot; Authentication and frontend-backend integration; API-driven full-stack projects	Supporting signal for the report.
DSA & problem solving	4.5	READY	250+ DSA problems solved; LeetCode, GeeksforGeeks and HackerRank practice; DSA certification	Supporting signal for the report.
Version control & testing	3.5	READY	Git and GitHub; Postman and Hoppscotch; Agile development experience	Should be validated during technical assessment.
OOP & service design	4	READY	OOP principles used in Java project; Spring and Spring Boot experience; Backend and full-stack architecture experience; Scalable serverless architecture project	Supporting signal for the report.

05 Next best action

TURN THE GAP INTO PROOF

NOW

Build and deploy a production-style full-stack application with automated tests and CI/CD

Converts strong project and development experience into stronger evidence of production engineering ownership.

WHY

Testing and engineering quality practices

Strong development experience with an opportunity to strengthen testing and delivery discipline.

EXPECTED OUTCOME

Demonstrable end-to-end engineering workflow covering development, testing, deployment and maintenance.

Resume demonstrates strong full-stack, backend, database and problem-solving capabilities. Direct technical assessment should validate coding, system design and engineering practices.

SUCCESS GATE

Testing & engineering practices

≥ 3.5 / 5.0

06 Final decision

KEEP THE HUMAN DECISION VISIBLE

PROCEED WITH A STRUCTURED PATHWAY

PROCEED TO TECHNICAL SCREEN

RESPONSIBLE USE

This is contextual decision support, not a permanent label or guarantee. Keep human review, consent, and evidence provenance visible.

EVIDENCE PROVENANCE	ASSESSMENT	SOURCE RECORDS
Coding performance, project work, interview/panel observations, and reviewer perspectives.	2026-09-09 · RESUME · mock drive 2 + panel round. Re-assessment due Dec 2026.	CAND-002 · RR-2026-0418.
